DETAILED ACTION

Information Disclosure Statement

The information disclosure statement (IDS) submitted on September 7, 2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Moll et al (#6,302,482).

Moll et al show a seat comprising a backrest and a sliding block disposed at a side of the backrest, wherein the backrest has a locking mechanism which can be operated by a draw band and is configured to secure the backrest in the sliding block guide, and wherein the draw band has a marking.

With claim 9, the vehicle seat is a vehicle rest seat.

With claim 10, the marking is configured as a shackle, eyelet or hook and can be hung in a mounting only if the backrest is correctly locked.

With claim 11, the mounting is a pin.

With claims 12 and 16, sliding block guide has two slideways, wherein one of the slideways is disposed on either side of the backrest, and wherein the locking mechanism has two bolts, and one of the bolts engages one of the slideways in order to secure the backrest.

With claims 13 and 17, the backrest has a transverse-running tube.

With claims 14 and 18-20, the bolts are joined together by a toggle lever linkage having two hinge-connected levers.

With claims 15 and 21-26, the draw band cooperates with the toggle lever linkage for axial displacement of the bolts.

Conclusion

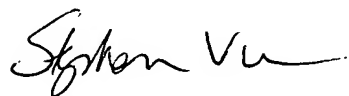

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Roslund, Jr. et al, Broadhead, Peterson et al, and DeKraker are cited as showing similar types of seat.
